[Luanne] We started this scholarship programme back in 1965.

We believe that Hong Kong is and always has been a part of who we are and what we do.

So we are really proud that our programme has supported more than 6,700 scholars over more than half a century.

[Prubjot] A lot of students are struggling because of COVID especially, and then it will really help them financially.

[Raymond] What really changes the world or what really helps the community is not simply money, but rather the talent, those talents who are willing to contribute to society and bless Hong Kong in the future.

[Noel] You are the future. You are the future of Hong Kong. You are the future of whatever business or whatever profession you decide to go into.

We at HSBC wish you all the very best for that future.

[Luanne] As you go, please tell the world about Hong Kong. About our unique strengths, about our amazing culture.

Because part of being an international city is about attracting international talent, international businesses, and international consumers.

[Noel] And if anytime you would like HSBC to be part of your future, please feel free to come forward.
